DETAILED ACTION

I. Applicant's Response:

- (a) Applicants response filed 5/2/2003 has been received and entered as paper no. 3.
- (b) Claims 1-19 are pending.

II. Restriction/Election:

- (a) Applicants have elected to prosecute the invention of group I, claims 1-9 and have elected the species of formula I-1 on page 4.
- (b) Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
- (c) Claims 10-19 are with drawn as being drawn to non-elected inventions. 37 CFR 1.142(b).
- (d) Generic Concept:

The generic concept that is being examined is as follows:

Compound of formula I in claim 1, wherein

R1 is aryl or alkyl of C1-C9;

R2 is aryl or alkyl of C1-C9;

R3 is alkyl of C1-C9;

R4 is alkyl of C1-C9; or

R3, R4 and N can form a three-to-eight membered heterocycle; and

R5 can be H or alkyl of C1-C6.

(e) The remaining subject matter of claim 1 is withdrawn from consideration as being drawn to non-elected inventions. 37 CFR 1.142(b).

Application/Control Number: 10/039,557

Art Unit: 1626

II. Rejections:

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "suitable ligands" in claim 1 is a relative term, which renders the claim indefinite. The term "suitable ligands" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably appraised of the scope of the invention. Amending said claim to limit the substituents to the group identified supra would overcome said rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 3-4 and 6-8 are rejected under 35 U.S.C. 102(a) as being anticipated by Hsu, et al.

Applicants claims relate to compounds of formula I in claim 1. The Hsu, et al reference discloses compounds that fall within the scope of claim 1.

(a) Claims 1, 3-4 and 8 are anticipated by example 27, 28 and 29 on page 8580 of reference. Wherein R3 and R4 together with the N form a six membered heterocycle or R3 and R4 are each independently alkyl; R1 is alkyl; R2 is aryl and R5 is hydrogen.

(b) Claims 6 and 7 are anticipated by example 28 and 29 on page 8580 of reference, wherein R3 and R4 are each independently alkyl; R1 is alkyl; R2 is aryl and R5 is hydrogen.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-4 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kossenjans, et al.

Claims 1, 3-4 and 6-8 are rejected under 35 U.S.C. 102(a) as being anticipated by Hsu, et al. Applicants claims relate to compounds of formula I in claim 1. The Hsu, et al reference discloses compounds that fall within the scope of claim 1.

(a) Claims 1, 3-4 and 8 are anticipated by example 26b of reference, wherein R3 and R4 together with the N atom form an eight membered heterocycle; R1 is alkyl; R2 is aryl and R5 is hydrogen.

III. Objections:

(a) Claims 2, 5 and 9 are objected as being dependent on a rejected base claim and would appear allowable if rewritten in independent form.

Art Unit: 1626

(b) Claims 1 and 10-19 are objected to as containing non-elected subject matter. 37 CFR 1.142(b).
